### 1. MCP là gì?

- MCP (Model Context Protocol) - 2024 November Anthropic phát triển, giúp AI kết nối và tương tác với các nguồn dữ liệu, công cụ và API bên ngoài. Nó hoạt động như một "cổng USB" cho AI, giúp đơn giản hóa việc tích hợp và tăng khả năng truy cập dữ liệu theo thời gian thực.

## ChatGPT 3.5 ▾

**You**

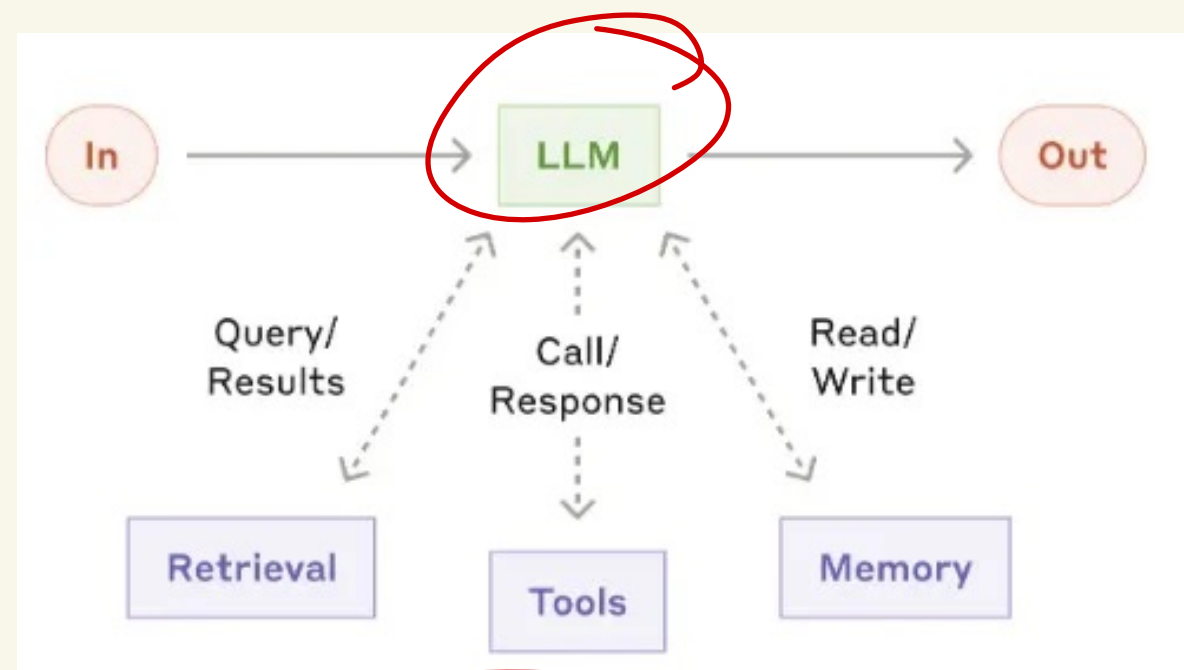

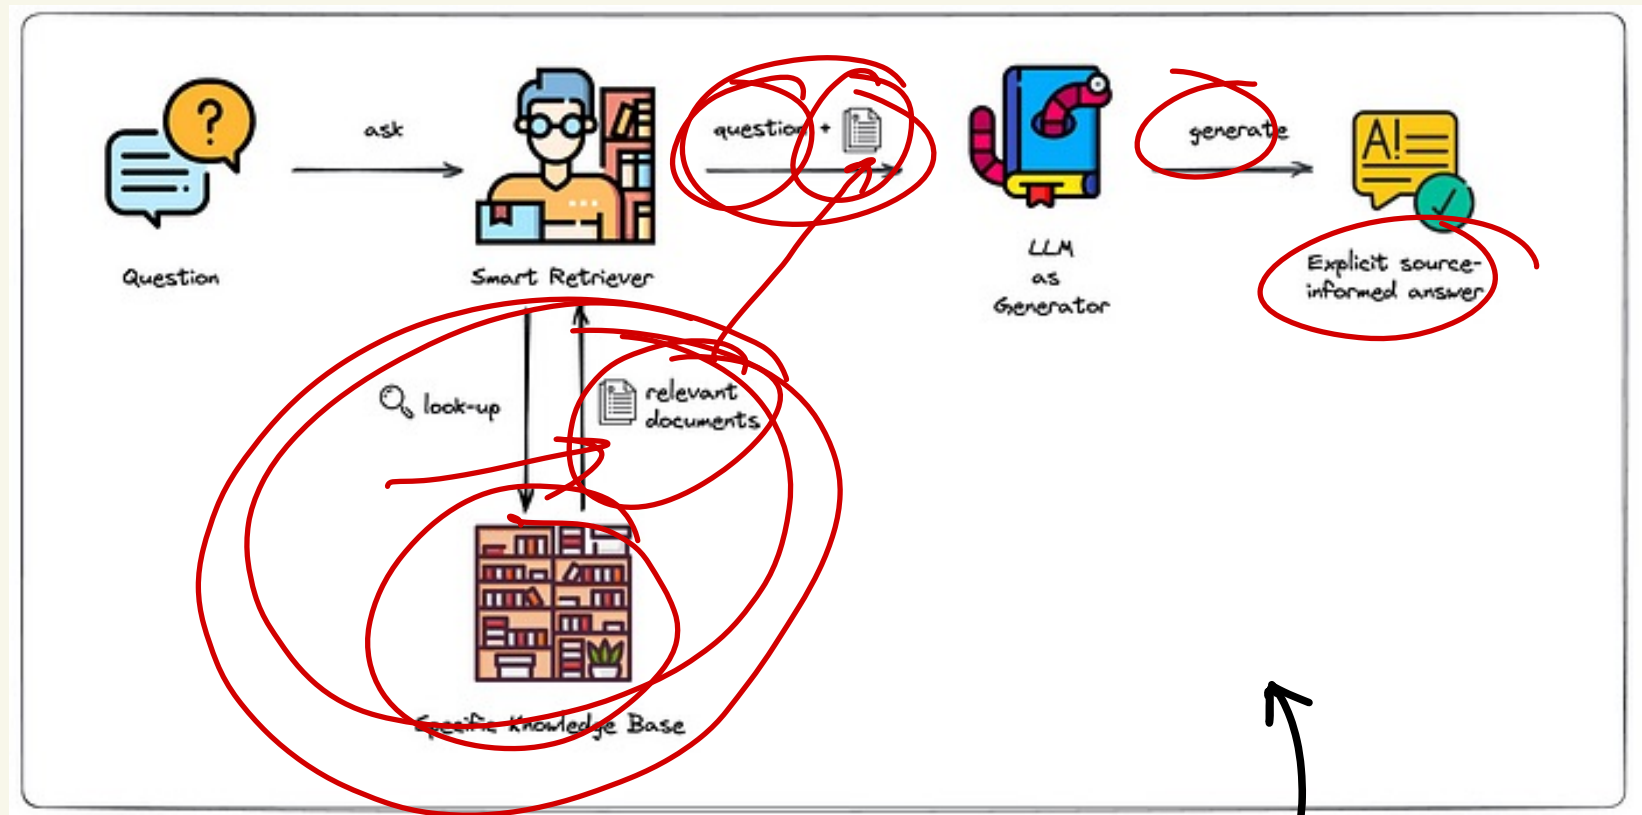

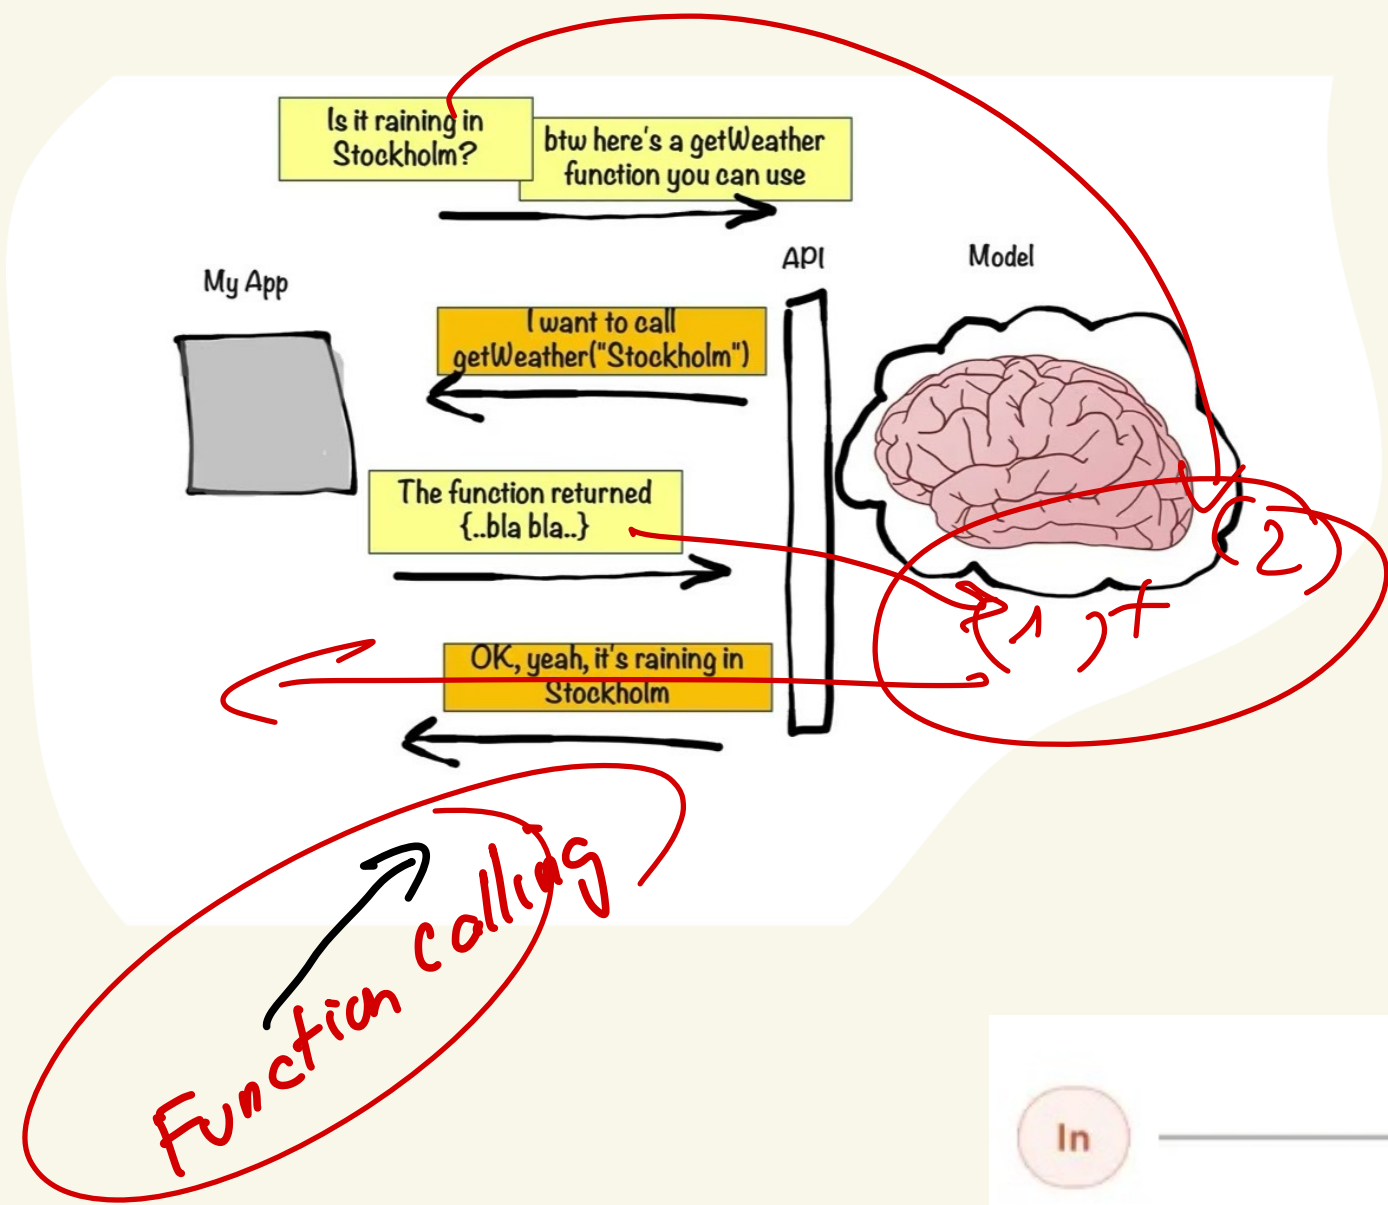

What is the knowledge cut-off date for ChatGPT 3.5?

**ChatGPT**

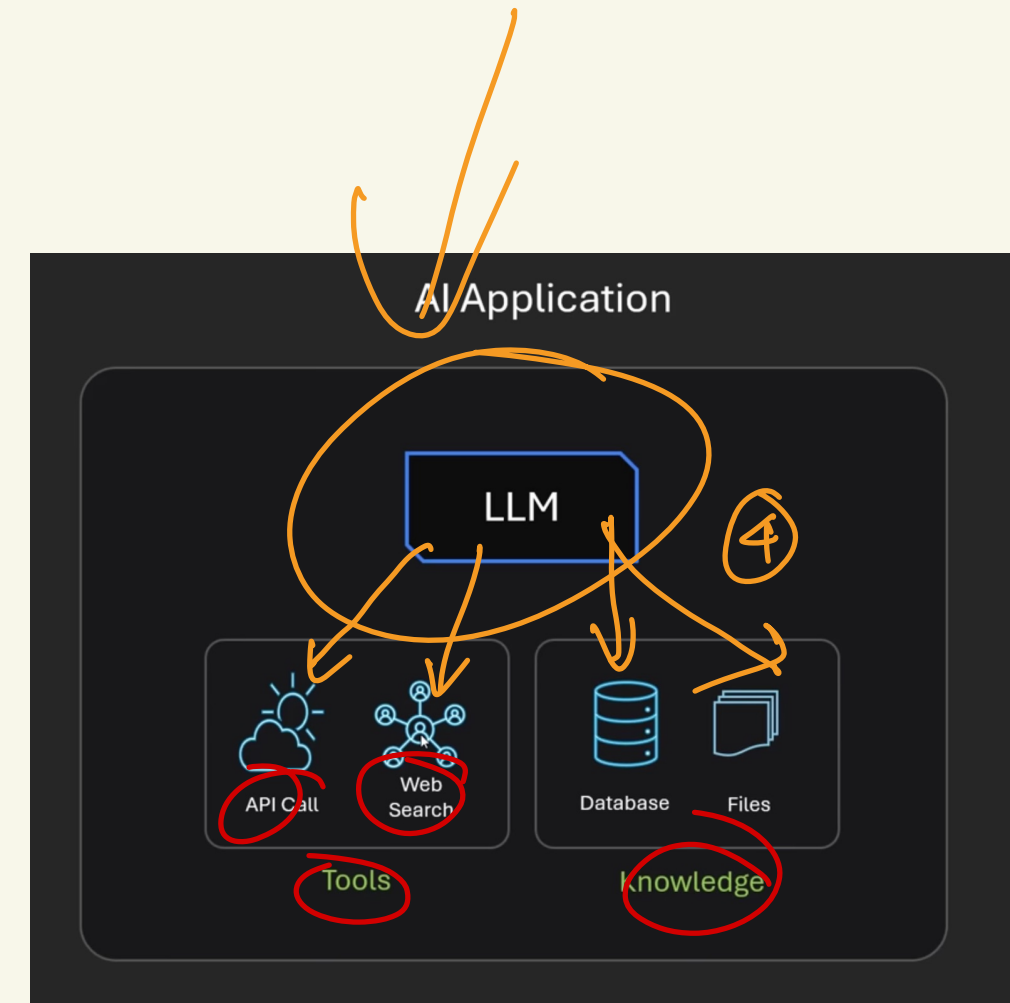

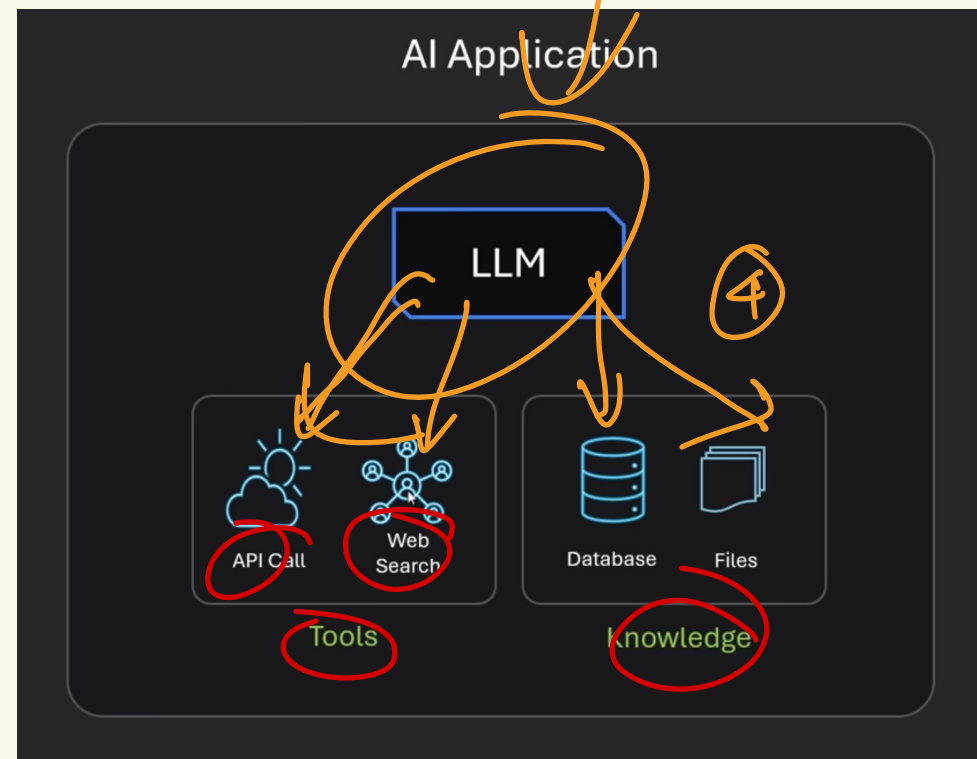

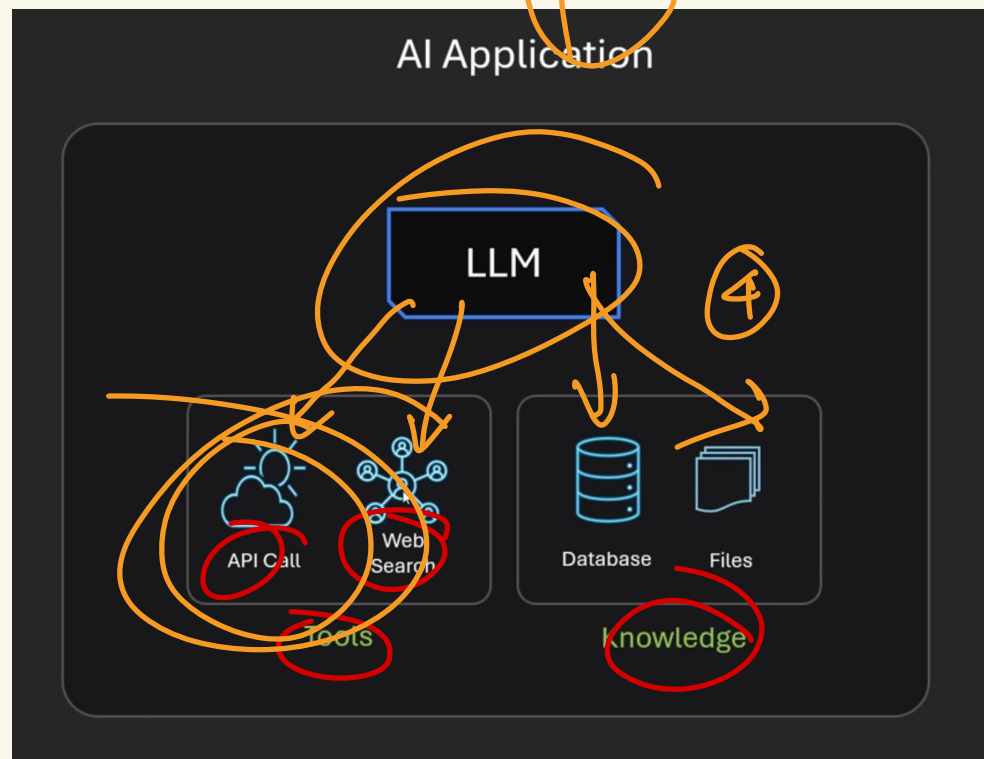

As of my last update in September 2021, I don't have specific information about ChatGPT versions beyond ChatGPT-3. My training data includes information up until that point, and I don't have details about releases or updates that may have occurred after that date. If there have been subsequent versions, such as ChatGPT 3.5, or updates, I wouldn't have information about them.

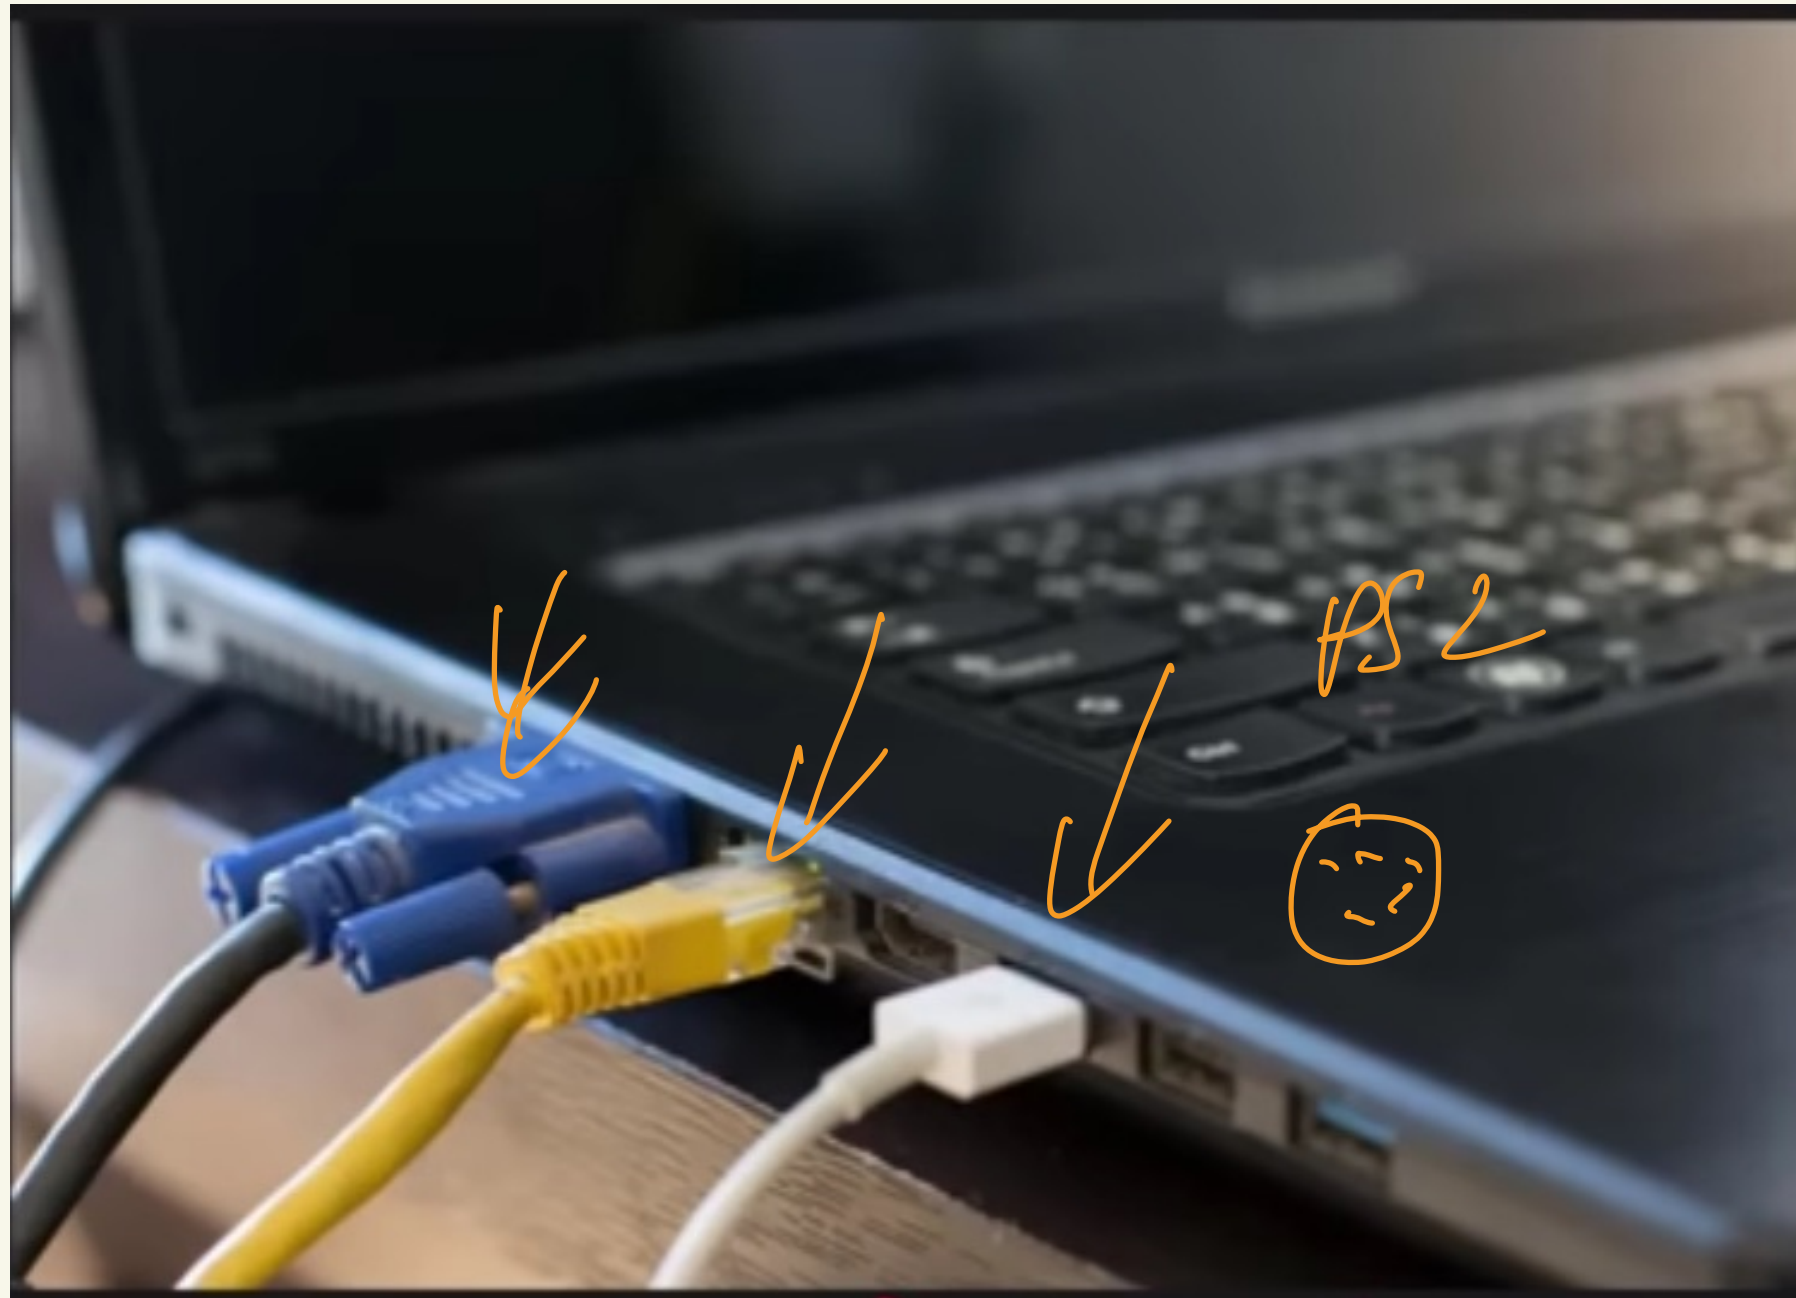

For the most accurate and up-to-date information about specific versions or updates, I recommend checking OpenAI's official communications, website, or other reliable sources for announcements and release notes.
